

Non-Metallic NEMA 4X Junction Boxes

Medium-to-large sized junction boxes, fabricated in PVC Sheet, make protection of your wiring easier, faster, and safer.

Typically, your only choice for medium-to-large junction boxes has been traditional steel boxes. Heavy to carry, prone to corrosion, difficult to cut, and easy to damage...but available. Now, you have a choice of rugged, durable, light, non-corrosive, watertight, PVC junction boxes. Using a proprietary system, these junction boxes are fabricated using a state-of-the art, computer controlled process that features full penetration welding, just like steel boxes.

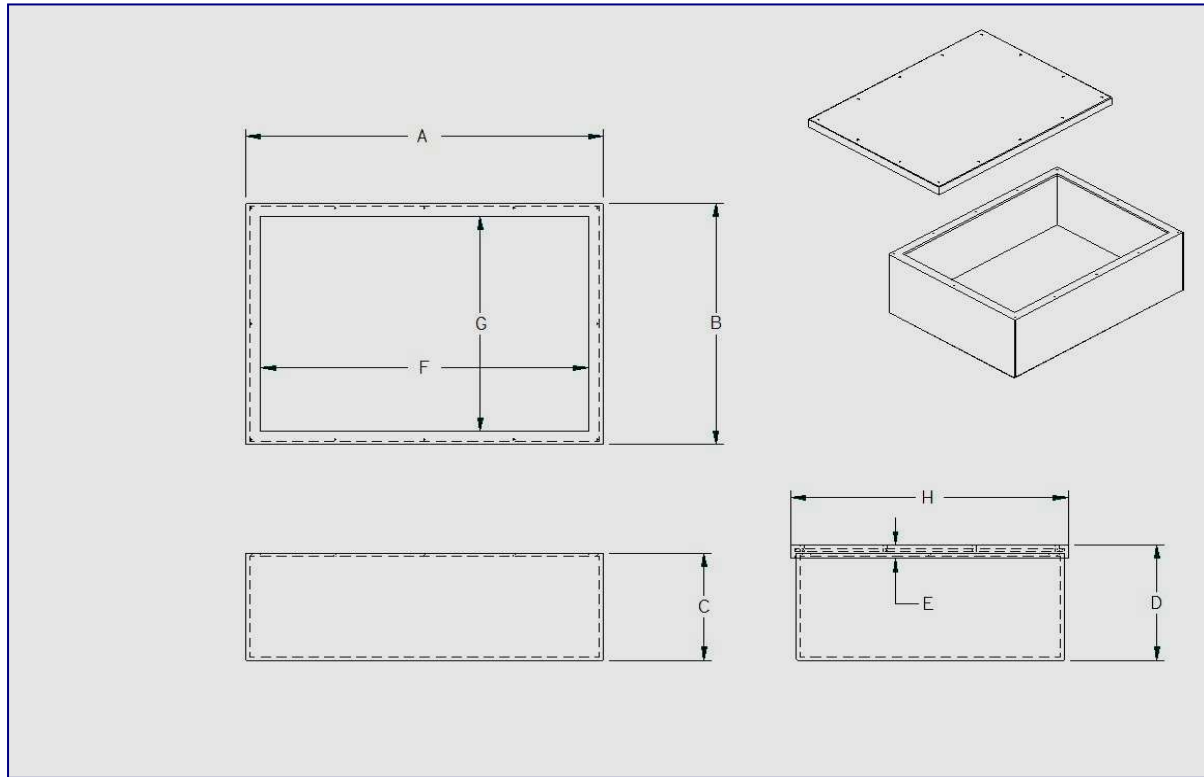

Features and Benefits

- ✚ PVC material with "uni-body" construction technique, combined with full penetration, like-material welding produces a strong, durable enclosure.
- ✚ UL-94 V-O Flame Rating
- ✚ Suitable for exposure to heat up to 90 degrees C°, just like PVC conduit
- ✚ Use standard PVC solvent cement to attach fittings
- ✚ NEMA 4X construction
- ✚ Fully Gasketed Cover
- ✚ **Custom sizes available upon request**
- ✚ **Custom features such as windows, subpanels, or internal mounting bosses are available**
- ✚ The unique (optional) mounting feet system makes installation easy and adaptable
- ✚ These enclosures do not hold a UL listing, rather they are built to NEMA 250 Standards
