DESCRIPTION

BEA's **SPARROW** is a highly flexible motion sensor designed to detect people and vehicles in a variety of industrial, security and pedestrian applications.

The **SPARROW**'s adjustable microwave antenna can be rotated ±120 degrees to create different sensing fields, capable of detecting bi-directional traffic (two way), unidirectional (approach only) and unidirectional away (departure only).

The **SPARROW** is designed to operate in industrial or harsh environments. It is ideal for motion detection applications including vehicle sensing, access control and warning indication.

Flexible Mounting

Mounting height from 6 1/2 feet to 20 feet

Adjustable For Optimal Detection

Ten sensor sensitivity settings can be applied to optimize detection

Weather Resistant

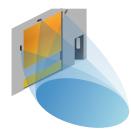

IP64 rated enclosure for industrial and harsh environments

Customizable Settings

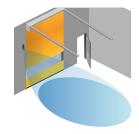

Immunity settings can be adjusted to reduce unwanted detections caused by rain, snow and header vibrations
