  - Adequate battery power (green LED on)
  - Low battery power (red LED on)
- Monentary contact power switch prolongs battery life

Overview

The Model CR-100 AVI Code Reader simplifies the process of validating and identifying the code programmed into Reno A&E Model AVI-X Automatic Vehicle Identification transmitters. The hand-held control unit features a six character LED display that provides an indication of the code being read and two battery condition LEDs that provide a visible indication of battery condition.
