

## **Saw Cut Application**

For installation in existing concrete or asphalt roads. Saw-cut loops are cut into the surface and sealed with loop sealant. If you plan to bury loops please go back and select "Direct Burial Application" to view the proper diagrams.

#### **Loop Sizes Needed:**

Reverse Loop: 36' Perimeter Loop

BD Loops Part#: SC 36-50

**Description:** 6' x 12' Loop with 50' of lead-in

This Loop will have approximately 48" of detection height.

Optional Exit Loop: 36' Perimeter Loop

BD Loops Part#: SC 36-100

**Description:** 6' x 12' Loop with 100' of lead-in

This Loop will have approximately 48" of detection height.

These are standard size loops. Standard size loops can ship same day from our Placentia, CA location. *Contact your BD Loops Distributor for more information*.

#### **Notes about Overhead Doors:**

Overhead doors require a minimum of 2 loops to properly protect the door path as pictured in red above:

- An Inside Reverse Loop or Exit Loop
- An Outside Reverse Loop

Reverse Loops will hold the door open, or reverse a closing door if a vehicle enters or stops within the door path. The inside reverse loop can be connected to the exit loop function if you desire. An Exit Loop will do everything a reverse loop does and will also open the door automatically when a car drives over it.

If there is space available on the secure side of the property an additional exit loop can be installed. The additional exit loop will allow more time for the door to open before vehicles reach the system. Customers enjoy the added benefit of not having to wait as long to exit the door.

If the site has multiple doors, each loop must maintain a minimum distance of 4 feet from one another.

# Don't Forget Loop Sealant!

BD-LS Loop Shield is available in Black or Gray.

Self Leveling • 100% Solids Low VOC • Quick Skin Time Made in the USA

### **BD** Loops

#### **Saw-Cut Loop Sizes**

The standard size loops listed in the chart to the right are available for same day shipping if BD Loops receives a PO from a distributor by 3:30 pm PST.

# Need a bigger loop or longer lead-in lengths?

Custom size loops are available and can ship same day if the PO is received by 12:00 pm PST.

#### **Need to Test Loops?**

The **BD-Megger** is an essential testing device that checks for the most common loop issue: a nick in the wire allowing current to leak to ground.

The E-Z Detector Checker quickly checks components upstream from the loop including the detector module, harness wiring, and circuit board loop connections.
