Direct Burial Application

For installation in concrete pours, gravel roads, dirt roads, under pavers, or underneath asphalt. If you plan to cut in these loops please go back and select "Saw-Cut Application" to view the proper diagrams.

Loop Sizes Needed:

Reverse Loop:	se Loop: 58' Perimeter Loop		
BD Loops Part#:	RL 58-40		
Description:	6' x 23' Loop with 40' of lead-in		
This Loop will have approximately 48 " of detection height.			

Description:	6' x 23' Loop with 100' of lead-in		
BD Loops Part#:	EL 58-100		
Optional Exit Loop:	58' Perimeter Loop		

These are custom size loops. Custom size loops can ship same day from our Placentia, CA location if we receive a PO by 12:00 pm PST. Contact your BD Loops Distributor for more information.

Notes about Slide Gates:

Slide gates require a minimum of 2 loops to properly protect the gate path as pictured in red above:

- An Inside Reverse Loop or Exit Loop
- An Outside Reverse Loop

Reverse Loops will hold the gate open, or reverse a closing gate if a vehicle enters or stops within the gate path. The inside reverse loop can be connected to the exit loop function if you desire. An Exit Loop will do everything a reverse loop does and will also open the gate automatically when a car drives over it.

If there is a long approach on the secure side of the property we recommend installing an additional exit loop further down the driveway. This will allow more time for the gate to open before vehicles reach the system. Customers will enjoy the convenience of exiting the system without having to wait for the gate to open.

BD Loops Saw-Cut Loops Are Available!

- Save Time Quick and Easy Installation
- Save on Materials Loop Sealant, Backer Rod
- Don't Have to Cut a Perfect Size Groove!
- Extra Protection: Durable Thick Outer Jacket -Holds up in cracked up surfaces

BD Loops

Direct Burial Loop Sizes

The standard size loops listed in the chart to the right are available for same day shipping if BD Loops receives a PO from a distributor by 3:30 pm PST.

Need a bigger loop or longer lead-in lengths?

Custom size loops are available and can ship same day if the PO is received by 12:00 pm PST.

Need to Test Loops?

The **BD-Megger** is an essential testing device that checks for the most common loop issue: a nick in the wire allowing current to leak to ground.

The E-Z Detector Checker quickly checks components upstream from the loop including the detector module, harness wiring, and circuit board loop connections.
