

Patriot 2 Non-Contact Telescopic Edge Sensor

INSTALLATION INSTRUCTIONS

Model # MIRF-T2 30/50 Ft.

US PAT.# 6,920,717 6,651,385

IMPORTANT:

READ AND UNDERSTAND ALL INSTRUCTIONS BEFORE BEGINNING INSTALLATION.

The Patriot 2 edge sensor is designed to transmit an infrared light beam from an emitter to a receiver housed below the bottom edge of the door. The emitting and receiving "eyes" plug into the bottom of the retracting legs. If the beam is interrupted by an object or person below the door, signals are sent to the door operator to stop and/or reverse the door.

2- Mounting

1. Move the door to a comfortable working height.
2. Disconnect ALL Power to the operator.
3. Install photo-eye mounting brackets on bottom corner brackets of door (*See Diagram #1*).
4. Insert photo-eye into hole of each retracting leg. Receiver photo-eye (shorter wire) mounts in the leg closer to the operator side. Emitter photo-eye mounts on the opposite side. Install rubber holders over the photo-eyes to hold in place.
5. Install supplied junction box on bottom section end stile closer to the operator side of door within reach of the receiving photo-eye wire (*See Diagram #2*).
6. Route Emitter wire across bottom section attaching to astragal retainer with the provided clips. Cut wire to appropriate length to terminate in end stile junction box. Route Receiver wire into same junction box.
7. Install Control Unit on the wall half way up the height of the door on the operator side as shown in Diagram #2 in conjunction with all Federal, State and Local codes.
8. For wiring guide refer to Section #3.

3- Wiring Connections

NOTE: RELAY and AC Cables are not supplied.
22 gauge - 4 conductor circular cable is recommended to maintain NEMA 4 rating.
