SOS-T8

nge RFID Vehicle Tag

1 3/16"

2 3/8"

9/16"
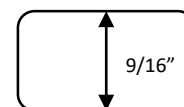

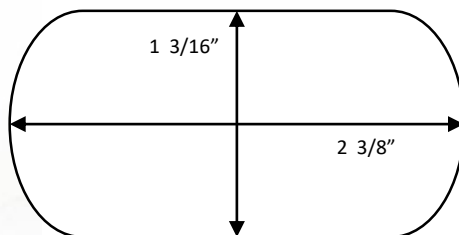

The SOS-T8 Long Range Vehicle Tags easily identify automobiles, trucks, buses and towed trailers for gate access control at military bases, airports, gated communities, hospitals, trucking and bus terminals, mines, single family homes, and all kinds of commercial facilities.

Tags can be covertly hidden in or on a vehicle as they do not have to be "seen" by SOS Silent or SOS Gate Trigger. The SOS-T8 Vehicle Tags can also be mounted directly to windshields with "metallic glass", if required. The transmitted tag data includes Customer Site Code, Wiegand Facility Code, Wiegand Tag ID, and Tag Age. For protection against environmental conditions, all tags are ultrasonically sealed in a molded plastic case.

 *Easily attaches to all surfaces, including metal
 * Vehicle Tags can be monitored at 300+ mph
 * Dynamic Tag Tracking
 * Adjustable Read Range: 1' - 600'
 * Optional Tamper Alarm and Motion Sensing Capability
 * Secure Encrypted Transmission between Tags and Readers
 * Tag transmits Serial ASCII data and 26 bit Wiegand coding for Access Control Systems
